

Acknowledgements

Volume III of the *National Firearms Commerce and Trafficking Assessment* would not have been possible without ATF Special Agents putting forth the effort to complete more than 12,000 surveys that the research team used to analyze firearm trafficking data. Learning what ATF Special Agents encountered and investigated in firearm trafficking investigations was instrumental in the formation of Volume III. The research team would also like to thank the numerous ATF employees who took time away from their busy schedules to educate them on the myriad of issues surrounding firearm trafficking.

The continued partnership between ATF and members of academic institutions has been an extraordinary and successful endeavor. Continued thanks to the academic team who spent countless hours poring over the vast amount of data collected in preparation of Volume III. Our academic partners who provided significant guidance during the preparation, research, and drafting of Volume III are Dr. Anthony Braga, Department of Criminology, University of Pennsylvania; Dr. Glenn Pierce, School of Criminology and Criminal Justice, Northeastern University; Dr. Alaina De Biasi, Department of Criminology and Criminal Justice, Center for Peace and Conflict Studies, Wayne State University; and, Dr. Lisa Barao, Crime and Justice Policy Lab, University of Pennsylvania. Thank you to the peer reviewers for their constructive comments and guidance, specifically, Dr. Philip J. Cook, Sanford School of Public Policy, Duke University; Dr. Garen J. Wintemute, University of California-Davis; and Dr. Rod K. Brunson, Department of Criminology and Criminal Justice, University of Maryland.

Special thanks to Ret. ATF Special Agent Dale Armstrong for his continued insight, experience, and guidance on issues surrounding firearm trafficking.

ATF is particularly grateful for the continued assistance of the Office of Justice Programs, National Institute of Justice for the resources required to ensure the success of this project.
