National Tracing Center Trace Request

Phone: 1-800-788-7133 Martinsburg, WV 25405 Fax: 1-800-578-7223
FOR NTC DATA ENTRY ONLY Page 1 of 2 - Trace Request Information

NOTE: * - Required Entry Field (Must be completed for trace processing)
** - Required Entry With Listed Data Response (See back for codes and options)

Part I - Trace Initiation Information

1a. Date of Request 1b. Priority** Routine Urgent (Justification required) For NTC Data Entry Only

1c. Special Instructions

Project Code, Project Title, or other Initiative (If you wish to obtain a Project Code, contact the Chief, Firearms Tracing Branch, ATF National Tracing Center)**:

Trace

2b. Phone Number: Fax Number: E-Mail: 2c. ATF Special Agent's Name (Last, first, middle)

3. Name (Last, first, middle)

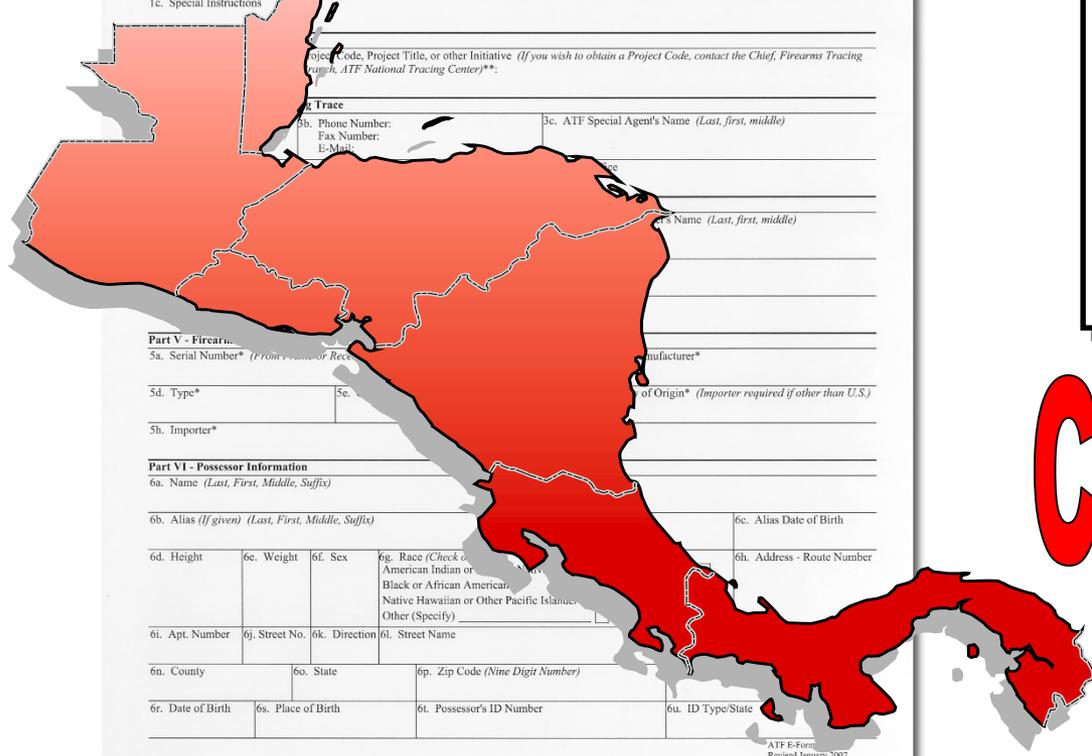

Part V - Firearm

5a. Serial Number* (From Form 4473 or Record) 5b. Manufacturer* 5c. Country of Origin* (Importer required if other than U.S.) 5d. Type* 5e. 5f. Importer*

Part VI - Possessor Information

6a. Name (Last, First, Middle, Suffix) 6b. Alias (If given) (Last, First, Middle, Suffix) 6c. Alias Date of Birth 6d. Height 6e. Weight 6f. Sex 6g. Race (Check one) American Indian or Alaska Native Black or African American Native Hawaiian or Other Pacific Islander Other (Specify) 6h. Address - Route Number 6i. Apt. Number 6j. Street No. 6k. Direction 6l. Street Name 6m. County 6n. State 6o. Zip Code (Nine Digit Number) 6p. Date of Birth 6q. Place of Birth 6r. Possessor's ID Number 6s. ID Type/State

ATF Firearms Trace Data Disclaimer

(1) Firearm traces are designed to assist law enforcement authorities in conducting investigations by tracking the sale and possession of specific firearms. Law enforcement agencies may request firearms traces for any reason, and those reasons are not necessarily reported to the Federal Government. Not all firearms used in crime are traced and not all firearms traced are used in crime.

(2) Firearms selected for tracing are not chosen for purposes of determining which types, makes or models of firearms are used for illicit purposes. The firearms selected do not constitute a random sample and should not be considered representative of the larger universe of all firearms used by criminals, or any subset of that universe. Firearms are normally traced to the first retail seller, and sources reported for firearms traced do not necessarily represent the sources or methods by which firearms in general are acquired for use in crime.

Introduction

The Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF) National Tracing Center (NTC) is the nation's only crime gun tracing facility. As such, the NTC provides critical information that helps domestic and international law enforcement agencies solve firearms crimes, detect firearms trafficking and identify trends with respect to intrastate, interstate and international movement of crime guns. For calendar year (CY) 2009, the NTC traced over 354,000 firearms; CY 2010, over 285,000 firearms; CY 2011, over 319,000 firearms; CY 2012, over 332,000 firearms; CY 2013, over 336,000 firearms; and CY 2014, over 351,000 firearms. Over this time period the NTC has traced firearms for the United States and 127 countries.

Firearms tracing is the systematic tracking of the movement of a firearm from its first sale by a manufacturer or importer through the distribution chain in an attempt to identify the first retail purchaser in order to provide investigative leads for criminal investigations. After the firearm is recovered and the identifiers are forwarded to the NTC, ATF contacts the manufacturer or importer to ascertain the sale or transfer of the firearm. ATF will attempt to contact all ensuing Federal firearms licensees (wholesale/retail) in the distribution chain until a purchaser is identified or the trace process cannot continue due to a lack of accurate or incomplete information on the trace request or in the Federal firearms licensee's records. The success of a trace result, whether domestic or international, relies upon the accuracy of the supplied firearm identifiers. The necessary identifiers for a trace include manufacturer, importer (if applicable), model, caliber and serial number.

The report relates only to firearms recovered in Central America and traced by ATF. The firearm trace results are based upon the supplied firearm identifiers on the Central America trace requests. The Central American trace data in this report is organized by the calendar year in which the respective authorities report the firearm was recovered, not the year in which the trace was initiated. For example, if El Salvadorian authorities recovered a firearm in 2014 but the trace was not initiated until 2015, the data will be organized in the year of recovery, 2014. Organization by recovery date provides valuable investigative leads as well as more specific trend data. Therefore, using this example, if a firearm for which a trace is initiated in later years is determined to have been recovered in 2014, the raw trace numbers for 2014 will increase in subsequent trace data reports. As a result, the trace numbers for each calendar year may fluctuate, necessitating changes to prior years' trace numbers in future reports. If a recovery date is not provided for a firearm, trace data for that firearm is organized by the calendar year in which the trace was entered into the Firearms Tracing System by ATF.

Analytical Criteria Used to Compile the Central America Trace Statistics

All of the attached trace statistics had the following selection criteria in common:

- Traces with a recovery country in Central America were included.
- Traces with a recovery date between January 1, 2014 and December 31, 2014 were included.
 - If a recovery date was not provided, traces with an entered date between January 1, 2014 and December 31, 2014 were included.
 - In CY 2014, 99.9% of the Central America traces listed a recovery date.
- Duplicate traces were not included. A duplicate is a trace request for the same recovery of a firearm that was previously traced.
- All traces may not have been submitted or completed at the time of this analysis.
- Statistics are based on a query of the Firearms Tracing System on March 10, 2015.

Total	3,311	100		2,914	100		944	100		845	100		80	100		63	100	

This chart is based upon firearms recovered in Central America in a particular year and submitted to ATF for tracing. In CY 2014, there were four firearms recovered in Nicaragua and submitted to ATF for tracing.

The category "U.S. Sourced Firearms" refers to those firearms that were determined by ATF to be manufactured in the U.S. or legally imported into the U.S. by a Federal firearms licensee.

"Manufactured in the United States" refers to those firearms that were determined by ATF to be manufactured in the U.S. by a Federal firearms licensee (manufacturer).

"Imported into the United States" refers to those firearms that were determined by ATF to be legally imported into the U.S. by a Federal firearms licensee (importer). Foreign manufactured firearms that are legally imported into the U.S. require that the importer name be stamped (impressed) on the firearm (27 C.F.R. Section 478.92). The firearm is traced by ATF through the U.S.-based importer, not the foreign manufacturer.

The category "Undetermined Source Country for Firearms" refers to those firearms in which the trace request did not provide sufficient information in order for ATF to determine a source country.

"Non-U.S. Manufacturer" refers to those firearms in which the trace request indicated a non-U.S. (foreign) manufacturer and a U.S. firearms importer was either not listed (possible omission of the trace requestor) or not required (a foreign manufactured firearm that never legally entered U.S. commerce and therefore would not bear the identifying stamp of a U.S. firearms importer). ATF is unable to determine if these non-U.S. (foreign) manufactured firearms were imported directly into Central America, or if the firearms were legally imported into the U.S. or went to another country and then made their way to Central America by legal or illegal means.

"Undetermined Country of Origin" refers to those firearms in which the trace request was unclear as to the manufacturer, country of origin and the importer. ATF is unable to determine the firearm's manufacturer, or if the firearms were imported directly into Central America, or if the firearms were legally imported into the U.S. or went to another country and then made their way to Central America by legal or illegal means.

"Total" refers to all firearms recovered in Central America in a particular calendar year and submitted to ATF for tracing.

Please note, changes to the trace data will occur in the future as result of the statistics being based upon the recovery date of the firearm.

**U.S. Sourced Firearms Recovered in Central America and Submitted to ATF for Tracing
Calendar Year 2014**

Country Name	El Salvador		Guatemala		Honduras		Panama		Belize		Costa Rica	
	# of Traces	% of U.S. Sourced Traces	# of Traces	% of U.S. Sourced Traces	# of Traces	% of U.S. Sourced Traces	# of Traces	% of U.S. Sourced Traces	# of Traces	% of U.S. Sourced Traces	# of Traces	% of U.S. Sourced Traces
Category - U.S. Sourced Firearms												
Traced to a Retail Purchaser	194	11.9	190	23.0	146	33.6	41	12.6	12	34.3	11	32.4
Traced to a Foreign Country	728	44.6	359	43.5	101	23.3	164	50.3	17	48.6	13	38.2
Unable to Determine a Purchaser	709	43.5	276	33.5	187	43.1	121	37.1	6	17.1	10	29.4
Total	1,631	100	825	100	434	100	326	100	35	100	34	100

This chart is based upon the **U.S. sourced firearms** from the page entitled "Firearms Recovered in Central America and Submitted to ATF for Tracing". The total does not include trace numbers from the category "Undetermined Source Country for Firearms".

The category "U.S. Sourced Firearms" refers to those firearms that were determined by ATF to be manufactured in the U.S. or legally imported into the U.S. by a Federal firearms licensee.

"Traced to a Retail Purchaser" refers to those traces in which ATF could determine the first retail purchaser, that is, a sale executed on an ATF Firearms Transaction Record (ATF Form 4473) from a U.S. Federal firearms licensee to a purchaser in the U.S. (As a comparison, for firearms recovered in the U.S. and traced to a retail purchaser, the average percentage for firearms traced for the time period CY 2014 is approximately 69%).

"Traced to a Foreign Country" refers to those firearms that were determined by ATF to be transferred from a U.S. Federal firearms licensee to a foreign government, law enforcement, dealer or entity.

"Unable to Determine a Purchaser" refers to those firearms that were manufactured in / imported into the U.S. but ATF was unable to determine the first retail purchaser through the trace process.

- Common reasons ATF is unable to identify a purchaser:
 - Incomplete firearms identifying data on the trace request form
 - Incomplete or never received out-of-business Federal firearms licensee records (upon discontinuance of business by a Federal firearms licensee, the records shall be delivered within 30 days to ATF or other Attorney General stipulated location (Title 18 U.S.C. 923(g)(4))
 - Altered or obliterated firearm serial numbers
 - The firearm is considered to be too old to trace
 - Current Federal firearms licensee records are incomplete or missing, or the Federal firearms licensee was unresponsive to ATF request for trace information

Please note, changes to the trace data will occur in the future as result of the statistics being based upon the recovery date of the firearm.

Types of Firearms Recovered in Central America and Submitted to ATF for Tracing Calendar Year 2014

Country Name	El Salvador		Guatemala		Honduras		Panama		Belize		Costa Rica

Total	3,311	100	2,914	100	944	100	845	100	80	100	63	100

This chart is based upon firearms recovered in Central America in a particular year and submitted to ATF for tracing.

The "Other" category can refer to machineguns, destructive devices, derringers, tear gas launchers, combination guns, flare guns, receivers/frames, silencers, any other weapons, and unknown types (to include trace requests that do not annotate a firearm type).

Please note, changes to the trace data will occur in the future as result of the statistics being based upon the recovery date of the firearm.
